INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP 03/11865

| V. | Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement |
|----|--|
| | |
| | |

| . Statement | o-pporting such statement | , | |
|-----------------------------|---------------------------|-----|-------|
| Novelty (N) | Claims | 1-5 | YES |
| | Claims | | NO NO |
| Inventive step (IS) | Claims | 1-5 | YES |
| | Claims | | NO |
| Industrial applicability (L | A) Claims | 1-5 | YES |
| Citations and explanation | Claims | | NO NO |

Citations and explanations

US-A-6 213 499 discloses an airbag for a side impact protection system, with at least one protection chamber 48 which in its inflated condition serves to intercept a vehicle occupant. The airbag has an overflow chamber 62 which is connected to the protection chamber via an overflow channel 60.

The subject matter of claim 1 of the present application differs from that of US-A-6 213 499 in that the overflow chamber is provided with a discharge opening, and in that the gas in the airbag flows from the protection chamber along the overflow channel and into the overflow chamber, from which it exits the airbag via the discharge opening.

The subject matter of claim 1 is therefore novel.

Airbags normally remain inflated for some time after an accident because there is no gas outlet. An inflated airbag can hinder occupant rescue attempts. The concept of providing a discharge opening in an airbag for side impact protection in order to facilitate occupant rescue is without precedent.

The solution proposed in claim 1 therefore involves an inventive step (PCT Article 33(3)).

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP 03/11865

Claims 2 to 5 are dependent on claim 1 and therefore also meet the PCT requirements in respect of novelty and inventive step.

The claims also meet the PCT requirement of industrial applicability.
